EXPLANATION OF PRECEDING TABLE.

If the time of High Water be required, according to the *civil* mode of reckoning:

1. *For the Morning Tide*:—With the day of the month *preceding* the given date, take the time opposite thereto from the 2nd column of the month, and diminish it by 12 hours.

2. *For the Afternoon Tide*:—With the given date, take the time opposite thereto from the 1st column of the month.

Example:—Required the mean Time of High Water, at London Bridge, for the Morning and Afternoon of Jan. 18, 1851.

Opposite the day *preceding*, viz., 17, and in the 2nd column under JANUARY, is 14h. 12m., which, being diminished by 12h., gives 2h. 12m. for the time of High Water in the Morning.

Opposite the given date, and in the 1st column under JANUARY, is 2h. 36m., which is the Time of High Water in the Afternoon.
